For Skipping the cutting and Sealing process we provide customization of Shrink Sleeves of any size with desirable die shape in the top of the sleeves. Application: Food and Beverage, Oil Products, Packaged Drinking Water, Lubricating and Vegetables Oils, Soft Drinks, Cosmetics and health care products, Pharmaceutical Products, Dairy Product, Spices and Pickles, Pesticides & herbicides, Liquor Industry, Ready to serve Juices

Salient Features of PVC Shrink Films:

- Excellent Transparency
- High Shrinking Capability at lower temperature
- Resistance to Moisture / Oil
- Good Mechanical Properties
- Excellent Electrical Insulation Properties
- Excellent Printability

Besides decorating the bottle/container, it provides glossy look to the product due to excellent quality of the Sleeve compared to conventional type of paper-labels.

PVC SHRINK FILMS

PVC NECK SHRINK

These sleeves provide protection against tampering of the goods. An intact seal is an evidence of untampered product and protects both consumer as well as manufacturer. Various manufacturers of cosmetics, foods, pharmaceuticals, beverages use these sleeves against tampering. Horizontal and vertical perforations are also provided as required, with a provision of notch for easy opening of the seals.

PRINTED PVC SHRINK SLEEVE

Printed Shrink Films are used all over the world by food, beverages, pharmaceutical and cosmetic manufacturers on their containers to improve aesthetic value as also to boost the brand image of their products. Printed Sleeves offer distortion-free coverage of the container and is ideal for use on glass, HDPE, PET, composite cans and tin containers. These Sleeves have distinct advantage of simple operation and low cost and can be manually placed on the containers before passing through the shrink tunnels.
